3. Exercise Ratio and Exercise Price

1 unit of Warrant will be entitled to purchase 1.167 ordinary shares at the price of 1.114 baht per share.

The Company shall issue ordinary shares in a non-fractional number not exceeding the number of the unit of Warrants to be exercised times by the Exercise Ratio. If there is a fraction of ordinary shares that will be received from the exercise of Warrants, such fraction shall be disregarded. The calculation of the ordinary shares derived from the exercise of Warrants and the payment required for the exercising shall be in accordance with the following formulas:

number of ordinary shares derived from the exercise of Warrants	=	number of the unit of Warrants to be exercised x Exercise Ratio
-----------------------------------------------------------------	---	--------------------------------------------------------------------

payment required for the exercising	=	number of ordinary shares derived from the exercise of Warrants x Exercise Price per share
-------------------------------------	---	-----------------------------------------------------------------------------------------------

For example : In the event where a Warrant Holder holds 17,256 units which if calculated in corresponding with the Exercise Ratio, the number of shares which to be received from the exercise will equal 20,137.75 shares [$17,256 \times 1.167 = 20,137.75$]. In this regard, the Company shall disregard the fraction of 0.75 and allocate the ordinary shares in a non-fractional number of 20,137 shares to such Warrant Holder. The Warrant Holder shall pay the exercise price according to the specified amount of the shares being purchased equals to 22,432.62 baht [$20,137 \times 1.114 = 22,432.62$] (with maximum two figures of decimal, round up to 0.01 if the third decimal equal to 0.005 or more, and round down if it less than 0.005) to the Company.
